McAfee Secure in 15: Greater Security for Business

Managing IT in a mid-sized organization and keeping it secure can seem like two full-time jobs. Give McAfee just 15 minutes a day, and get around-the-clock protection. With simple daily security practices, you can protect your networks, systems, data, email, and web traffic — so you can get back to business.

McAfee delivers best-of-class products that fit the needs of mid-sized businesses. Packaged to meet smaller budgets through user software pricing, scalable multifunction appliances, and cloud-based Security-as-a-Service solutions, our products deliver more security with less to deploy and manage. Targeted to eliminate system threats, data breaches, and data loss, McAfee products protect email and web traffic, and defend networks inside and out. [Read More](#)

Integrated Suites for Mid-Sized Business

Mid-sized organizations face the same threats as larger enterprises, but have fewer resources and far less time to dedicate to security management. McAfee has products developed specifically to address those challenges. We understand IT requirements in mid-sized organizations, including the need to reduce the number of products to manage and get the most amount of protection for the fewest dollars. With McAfee, secure your systems, email, web, and data — all with one affordable solution.
